

Model Feature

Renault Kangoo

The Renault Kangoo has been one of the most popular compact vans on the market ever since its initial launch back in 1997. The Kangoo's practicality, economy and comfortable drive have made it the ideal choice for businesses right across Europe.

It's easy to see why the Kangoo is one of Europe's top selling compact vans but the Kangoo range goes beyond the LCV market with a number of body styles aimed squarely at the passenger market.

Furthermore, the current generation Kangoo shares a platform with its cousin, the Mercedes-Benz Citan. With sales of the Kangoo van/passenger range holding steady and Citan sales strong, replacement parts really do provide you with a genuine opportunity.

Comline provides you with the perfect solution to take advantage of the Kangoo. Our mantra of consistent, reliable quality and margin-enhancing value makes Comline parts the right choice for your business.

Renault Kangoo - 1.4 (2011)
