

Model Feature

Vauxhall Insignia

The Vauxhall Insignia is the successor to the Vectra, a car that had many detractors among the motoring press but was nonetheless a firm favourite with families and company car drivers.

The Insignia has carried on where the Vectra's popularity left off but it is undoubtedly a huge improvement on the model it replaced. Exterior styling has been greatly enhanced and the interior is a far nicer place to be. There's also been a huge uplift to the car's standard equipment levels and a vast improvement in driver engagement.

As one of the nation's favourite models, particularly among company car users, the Insignia is often subjected to high annual mileage. So, not only is there a massive Insignia market out there but the vehicles are also churning through replacement parts, particularly 'wear and tear' items, at a rapid rate. There is little doubt that the Insignia is absolute gold for the aftermarket.

Comline's comprehensive range of parts for the Vauxhall Insignia is essential for driving your business forward. Safety, reliability and performance is at the very forefront of our development process and each Comline part is designed to inspire confidence. Couple this with our always competitive pricing and it's easy to see why Comline is the ideal choice for your business.
