

# Model Feature

## Volkswagen up!

The VW up! is one of the best small city-cars on the market today and has sold over 100,000 units each year since its initial launch! With its funky styling, an attractive price tag and VW's in-built quality DNA, the up! has been a massive hit with urban drivers right across the continent.

And speaking of quality DNA, that's exactly what Comline's range of parts for the VW up! has to offer. Comline takes great pride in delivering parts with genuine quality and affordability, traits which we have in common with the VW up! It's therefore safe to say that Comline replacement parts and this 'diddy' VW are the perfect match.

To talk to your Sales Manager and discuss the Comline range in more detail please call **01582 578 888**.

Volkswagen up! - 1.0 (2011)
